

Program Overview:

Society must become healthy, every individual who is the most important element of society must become healthy. To achieve this, an individual's way of leading life must be healthy. What is a healthy way of life? What are the ways to adopt? To attain physical, mental, intellectual, social and spiritual well-being, our ancestors have laid down the path of a healthy lifestyle starting from food habits to ethical conduct. Communicating this clearly to people in an easily understandable manner through a detailed study of the lifestyle laid down by our ancestors, supported by scientific evidence is the work plan of "Swasthya Bharathi".

Target population:

Students / Healthcare staff / General public etc

Program Duration & Structure:

4 weeks, 2 hours/day. Online/Offline

Eligibility Criteria:

Candidates with any degree who are passionate about lifestyle modification.

The program is educational in nature and aims to train participants to guide others at a basic level. The Code of Conduct shall be applicable throughout the training period.

Curriculum Details of Swasthya Bharati (Life style program) Training:

Learning Goals/Outcomes:

1. Knowledge-Based Outcomes

Trainees will be able to:

- Explain the concept of health (Swasthya) from Ayurveda, Yoga, Homeopathy, Naturopathy and modern medicine perspectives.
- Understand the role of lifestyle factors (diet, sleep, physical activity, stress, mental health, habits) in the prevention of non-communicable diseases.
- Describe the Ayurvedic principles of *Dinacharya*, *Ritucharya*, *Tridosha*, and *Agni* in daily living.
- Understand the scientific basis of various aspects of Lifestyle on physical, mental, emotional, social and spiritual health.
- Identify the impact of stress, emotions, and behavior on psychosomatic disorders.
- Recognize early warning signs of lifestyle-related disorders such as obesity, diabetes, hypertension, musculoskeletal disorders, and mental stress.

2. Skill-Based Outcomes

Trainees will be able to:

- Apply daily lifestyle corrections related to diet, posture, movement, breathing, and ergonomics.
- Plan and follow a balanced daily routine suited to age, occupation, individual capacity and body constitution.
- Use simple self-care techniques for stress management, sleep improvement, and energy balance.
- Conduct basic lifestyle assessment and identify unhealthy habits.
- Communicate lifestyle advice effectively to individuals and groups.

3. Attitude & Value-Based Outcomes

Trainees will:

- Develop self-discipline, self-awareness, and responsibility toward personal health.
- Cultivate a preventive mindset rather than a disease-oriented approach.
- Appreciate the importance of ethical living, moderation, and balance.
- Develop respect for Bharatiya traditional health systems.
- Build a positive attitude toward mental well-being, emotional regulation, and compassion.
- Strengthen values like regularity, cleanliness, mindfulness, and self-control.

4. Application & Life Integration Outcomes

Trainees will be able to:

- To systematically integrate healthy lifestyle practices into both personal and professional domains, focusing on nutrition, work-life balance, structured routines, adequate sleep, and effective stress management.
- Manage common lifestyle-related complaints through non-pharmacological methods.
- Contribute to public health awareness and preventive healthcare initiatives.

5. Professional & Community Impact Outcomes

Trainees will be able to:

- Assist healthcare professionals in lifestyle counseling and wellness programs.
- Design and conduct basic lifestyle awareness sessions.
- Promote integrative healthcare approaches ethically and responsibly.
